Middle Grades Social Studies 2012 History Journal Survey Prentice-Hall Staff, 2010-07 Once your child has completed his or her primary education, you'll have to seek curriculum for homeschool that covers History in greater detail. Your child is ready to face a bigger challenge when learning, and myWorld History is there to provide it. This middle school curriculum bundle breaks the barrier between History as a living thing and the subject as it's presented on paper. Not only will your child learn relevant dates over the course of the program, he or she will also experience the stories that make up the entirety of History. myWorld History provides you and your child with project-based activities and interesting tales that take you on a journey through time. Your child will get to read about other people who lived all over the world and in different time periods, helping the lesson resonate. With all the engaging content provided by myWorld History, your child will develop a strong knowledge of History and the cultures of which it is comprised. Ideally, such exposure to different cultures will help

your child become more empathetic and a better critical thinker. Furthermore, each chapter of myWorld History kicks off with an Essential Question. This question guides your child through the material, causing him or her to analyze the lesson's content as he or she progress through the chapter. Your child will have to ask questions and search for answers while addressing the Essential Question. Stories, activities, games, the student journal and projects relate back to the Essential Question, the main idea of the chapter. The myWorld History curriculum for homeschooling is the next step after the myWorld Social Studies series and can be used before or after myWorld Geography. The Bundle includes the Student Edition, Student Journal, Student Journal Answer Key and Parent Guide materials. The content in each lifts History off the page to keep your child engaged in the learning process. myWorld History proves that homeschool is full of exciting experiences and invaluable lessons. For more information about the specific materials included in myWorld History, visit the Features and Benefits page. Take your child on a journey through time without leaving home. With innovative resources, project-based activities, and unprecedented support for all learners, myWorld History takes students beyond the printed page to actively experience the history of the world in which they live.

Comparative Perspectives on School Textbooks Dobrochna Hildebrandt-Wypych, Alexander W. Wiseman, 2021-04-22 This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

*Globalisation, Nation-Building and History Education* Joseph Zajda, John Whitehouse, 2024-03-19 This book uses historiography and discourse analysis to provide a new insight into understanding the nexus between ideologies, the state, and nation-building—as depicted in history school textbooks. It focuses on the interpretation of social and political change, significant events, and examining possible new biases and omissions in school textbooks. The ‘Europeanization’ of history textbooks in the EU is an example of western-dominated Grand Narrative of pluralist democracy, multiculturalism, and human rights, according to the canon of a particularly European dimension. Various public debates in the USA, China, the Russian Federation (RF), Japan, and elsewhere, dealing with understandings of a nation-building, national identity, and history education point out to parallels between the political significance of school history and the history education debates globally. The book demonstrates that the issue of national identity and balanced representations of the past continue to dominate the debate surrounding the goals, dominant ideologies and content of history textbooks, and historical narratives. It concludes that competing discourses and ideologies will continue to define and shape the nature and significance of historical knowledge, ideologies and the direction of values education in history textbooks. This book provides an easily accessible, practical, yet scholarly insights into local and global trends in the field of history education, and should be required reading for a broad spectrum of users, including policy-makers, academics, graduate students, education policy researchers, administrators, and practitioners.

*Whatever Happened to High School History?* Bob Davis, 1995-01-01 Bob Davis examines official high school history teaching and related government policies from the 1940s to the mid-1990s, providing essential background for those

concerned with how history will be taught in the 21st century. Davis traces the demise of the old historiographical narrative of progress, the rise of an essentially content-free skills-based approach to education, and the emergence of the new orthodoxy of post-modern theory, identifying the weaknesses of each and suggesting fruitful directions for future development of history teaching. *Whatever Happened to High School History?* is a passionate and insightful account of crisis and decline in a subject that used to be the pillar of the secondary curriculum. An *Our Schools/Our Selves* book.

*Reading Actively in Middle Grade Social Studies* Don K. Philpot, 2019-08-14 Middle grade students can learn a great deal about themselves and their world by reading informative texts in social studies courses. These texts will focus on important topics in history, geography, civics, government, and economics and offer students a range of perspectives on past and present social events. But reading is a complex act, and most students need specific reading-related support to understand assigned texts in middle grade social studies courses. This book focuses on the cyclical nature of reading, the actions proficient readers engage in to understand social studies textbooks and other informational texts, and the instructional support that teachers can provide to enhance middle grade students' learning of social studies content through reading. Three associated questions will be addressed in this book: •What actions do proficient readers engage in to understand assigned course texts? •What do these actions entail, and how do they relate to each other? •What teacher-mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading?
